

certificate no.

920081402

This certificate is established in conformity with the "International Rules for Grading Polished Diamonds", approved by the World Federation of Diamond Bourses and the International Diamond Manufacturers Association at the May 1978 Congress.

The stone in accordance with the above mentioned number has been identified as a natural gem diamond and has the following description :

shape	brilliant
weight	0.53 ct
clarity grade	loupe-clean
fluorescence	slight
colour grade	exceptional white + (D)
measurements	5.26-5.30mm x 3.14mm
proportions	very good
girdle	medium 4% faceted
culet	pointed
table width	62%
cr. height	11.5%
pav. depth	44%
finish grade	good
comments	

clarity grade
(magnification 10 X)

colour grade

loupe-clean	X	exceptional white +	X
vvs 1		exceptional white	
vvs 2		rare white +	
vs 1		rare white	
vs 2		white	
si 1		slightly tinted white	
si 2			
p 1		tinted white	
p 2			
p 3		tinted colour	

identification marks:
external characteristics and
minor graining

Red symbols refer to internal and green symbols to external characteristics. The symbols do not usually reflect the actual size of the characteristics. The characteristics have been indicated in order to clarify the description and/or for further identification.

antwerpen, 17/09/1992

gemmologists

Lucmans *[Signature]*
The characteristics of the above mentioned diamond have been established by scientific measurements and observations, carried out in the laboratory of the Diamond High Council.

proportions

finish grade

very good	X	very good	
good		good	X
unusual		medium	
		poor

DIAMOND REPORT

This report is a statement of the diamond's identity and grade including all relevant information about the submitted stone.

Number: F2B44654

ANTWERP, 18 SEP 1992

LABORATORY REPORT (ORIGINAL)

TO WHOM IT MAY CONCERN.

DESCRIPTION: **NATURAL DIAMOND**
 SHAPE AND CUT: **ROUND BRILLIANT**
 WEIGHT: **0.43 Carat**
 MEASUREMENTS: **4.85 - 4.95 x 2.96mm**
 PROPORTIONS and FINISH
 Table Diameter Percentage **60 %**
 Crown Height Percentage **14 %**
 Pavilion Depth Percentage **44 %**
 CULET SIZE: **POINTED**
 GIRDLE THICKNESS: **THIN TO MEDIUM (FACETED)**
 FINISH: Polish/Sym & Prop **VERY GOOD / VERY GOOD**
 CLARITY GRADE (10 x): **INTERNALLY FLAWLESS**
 COLOR GRADE: **D(0+)**
 FLUORESCENCE: **NONE**

The symbols do not usually reflect the size of the characteristics.
Red symbols indicate internal characteristics.
Green symbols indicate external characteristics.

COMMENTS: (Insignificant external details, visible under high magnification, are not mentioned)

Control Department

LABORATORY DIRECTOR, GEMMOLOGIST

SPACE FOR DOUBLE CHECK, CLARITY AND COLOR GRADE

CLARITY GRADE	Internally Flawless	vs1	vs2	vs1	vs2	s1	s2	p1	p2	p3									
COLOR GRADE	D+	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	FANCY COLOR

PROPORTIONS - MARGIN: ± 1%
MEASUREMENTS - MARGIN: ± 0.02 mm.

The gemmological analysis of diamonds, precious stones and other minerals must be carried out by specialized gemmologists with many years' experience in this field who have a keen sense of the professional code of ethics governing their work as well as a thorough knowledge of crystallographic, optical and physical phenomena.

The identification of the various species and varieties of stones, the distinction between natural and synthetic stones, as well as various treatment methods currently encountered are all very important factors.

More specifically for diamonds, the laws of refraction and dispersion of light, the related geometric data as well as knowledge of all aspects involved in the cutting process are essential.

Definition of a stone's color requires knowledge of type Ia, Ib, IIa and IIb diamonds, and correct use of masterstones and other relevant techniques. In order to grade the clarity of a diamond, the nature, number, size and location of any inclusions as well as any other secondary external characteristics must be determined.

This report is subject to the terms and conditions set forth on page 2 hereof.
